HJ Landscaping - Full Website Setup Guide

1. Extract the ZIP file contents.

2. Inside the folder, you will find:

   - index.html

   - quote.html

   - maintenance.html

   - contact.html

   - design.html

   - style.css

   - images/ (folder with all design element icons)

3. Upload these files to your GitHub repository:

   https://github.com/YOUR_USERNAME/hjlandscaping.github.io

4. Replace any old files with these updated versions.

5. Test your website at:

   https://hjlandscaping.github.io

6. Test the Design Tool at:

   https://hjlandscaping.github.io/design.html

7. Customers will be required to enter their name & email before using the design tool.

8. You can customise the images by replacing files inside the /images folder.
